IS PLAYING AT A ONLINE CASINO SAFE?

According to statistics the main concern all new online casino players have is the uncertainties surrounding the deposit of money to and payout's from online casinos. This concern could not be more valid. Most online casino players would agree that the best weapon you have against being taken advantage of is common sense.

Like any other in the company operating in the business world today you just won't stay in business long if you don't treat your customers fairly. Simple but true. The online casinos recognize this and have a tremendous amount more to lose than paying you you \$10,000 in winnings. Online casinos are professionally run organizations that cost millions in software and millions in start up costs just to get them off the ground.(Boss Media recently sold a domain name they had for 4.5 million) Once a casino is up and running the competition and need the casino feels to not only keep you as a player but a happy one at that is huge.

There are many casinos to choose from, if you don't like where you are playing at then move on. We always play for free first to get a feel for the casino and that way we can ask any questions we may have to see how receptive they are to our concerns. A few of our favorites are [Windows Casino](#), [Sci Fi Casino](#) and [Piggs Peak Casino](#)
